The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 11. does NOT place the application in condition for allowance because: Applicants argue that the continuous solid phase fuel of Stickler is not the same as the open pore foam of the instant invention. This is not persuasive because applicants have not argued as to why it would not of been obvious to substitute one known fuel for another. Applicants remaining arguments against Stickler are considered to be improper piece meal analysis. Applicants argue against the Reynolds reference, however, this is considered to be improper piece meal analysis. Applicants argue against the Keilbach reference that the Be fuel of the reference has nothing to do with the plastic fuel of the instant invention. This is not persuasive because both are fuels and the skilled artisan would appreciate that it is sometimes necessary to protect fuels from oxidizers, whether they be metal or plastic fuels. Applicants argue that Reynolds teaches the use of a metallic sponge and not a foam. This is not persuasive because a sponge is a type of foam. Applicants remaining arguments against Reynolds are considered to be improper piece meal analysis. Applicants argue against the reference of Grosse. These arguments are considered to be improper piece meal analysis. Applicants remaining arguments have been fully considered but are not persuasive for the reasons generally given in the earlier office actions.
